BURDETTE'S PHILOSOPHY.

A few years ago a young man named Cas-

that no paper hanger ever did that much work in a day. People now living in Skaneateles who rerecopie now living in Signeateles who resided there in the spring of 1783 still remember the excitement over the remarkable case of the Rev. Lars Christophersson, rector of the Aboriginal American church. He was sitting in his study one Sabbath morning, in a morbid and gloomy state of mind, having "Just my luck. I wanted to lick a man just learned that his son, who had gone off on a little scalping party down the lake the night[before, had taken the only razor in the amed Polonius. I expected to find him in here. I've been to a good deal of trouble in chasing around after him, and it seems too While the elder sat gloomily rubbing his chin and wondering if he couldn't sandpaper it before class meeting, a storm that had been gathering for some time sud-denly broke above the town with terrific vio-"Yes, it does," replied the biggest one of "Polonius hasn't any friends here, has her" lence. A long zigzag streak of ball lightning entered the window of the minister's study. "Bully! In that case one of them might want to take his place, you know."
"Yes, perhaps I might."
"If you only would! Say, I can hammer
you to squash in two minutes!" shaved him once over without raising a pimple, trimmed his hair straight across the back of the neck, giving him that peculiarly meek look of meekly meekness which is the artistic triumph of that style of cut, banged it in front to make him look childlike and simple, gave his shoes a patent leather shine, brushed his coat and was out of the window again with a crashing noise like a 4-year-old boy falling off a pew during the long prayer. All went out, the two flung off their coats, and it wasn't more than a minute before the man who was looking for Polonius grabbed his coat and ran down the alley, just escap-The strangest thing about the occurrence was not discovered until that evening, when the
